

**Amendments to the Claims**

Please amend the following claims.

1. (Original) A surgical drape system comprising:
  - a drape having a main sheet portion for covering at least a substantial portion of a patient, the drape having a fenestration for providing access to an operative site;
  - a rear panel and a front panel superimposed one over the other and sealed to one another along a bottom edge and partially up opposing side edges so as to form a pouch having an open top and partially open sides, the rear panel attached to the drape in proximity to the fenestration;
  - a plurality of spaced apart fasteners disposed upon at least one of the panels proximate to the open top for fastening sections of the front and rear panel to one another thus establishing alternating fastened and unfastened regions in the open top.
2. (Original) The system of claim 1 wherein at least a portion of at least one of the panels is clear.
3. (Original) The system of claim 1 wherein the fasteners comprise hook and loop type fasteners.
4. (Original) The system of claim 1 wherein the fasteners comprise snap type fasteners.
5. (Original) The system of claim 1 wherein the fasteners comprise lengths of adhesive material.
6. (Original) The system of claim 5 wherein the adhesive material comprises adhesive tape.
7. (Original) The system of claim 1 wherein the pouch is capable of retaining liquids.
8. (Original) The system of claim 1 wherein the rear panel comprises an adhesive for attaching the pouch to the drape.

9. (Original) The system of claim 8 wherein the adhesive comprises adhesive tape.
10. (Original) The system of claim 1 wherein the pouch is adjustably attached to the drape.
11. (Original) A surgical drape system comprising:
  - a drape having a main sheet portion for covering at least a substantial portion of a patient, the drape having a fenestration for providing access to an operative site;
  - a tubing caddy attached to the drape in proximity to the fenestration having a plurality of spaced apart fasteners disposed thereon for interweaving and holding medical lines and tubes, the caddy further comprising overlapping panels sealed to one another along a bottom edge and partially up opposing side edges.
12. (Original) The system of claim 11 wherein at least a portion of at least one of the panels is clear.
13. (Original) The system of claim 11 wherein the fasteners comprise hook and loop type fasteners.
14. (Original) The system of claim 11 wherein the fasteners comprise snap type fasteners.
15. (Original) The system of claim 11 wherein the fasteners comprise lengths of adhesive material.
16. (Original) The system of claim 15 wherein the adhesive material comprises adhesive tape.
17. (Original) The system of claim 11 wherein the caddy is capable of retaining liquids.
18. (Original) The system of claim 11 wherein the caddy comprises an adhesive for attaching to the drape.
19. (Original) The system of claim 18 wherein the adhesive comprises adhesive tape.

20. (Original) The system of claim 11 wherein the caddy is adjustably attached to the drape.

21. (Currently Amended) A surgical drape system comprising:

a drape having a main sheet portion for covering at least a substantial portion of a patient, the drape having a fenestration for providing access to an operative site;

a pouch having a top, a bottom, and sides, attached to the drape in proximity to the fenestration, the bottom and at least a portion of the sides being sealed to permit liquid to be held within the pouch, the top and ~~at least another~~ a second portion of the sides having a fastener disposed thereon for holding medical lines and tubes.

22. (Original) The system of claim 21 wherein the fastener comprises a hook and loop type fastener.

23. (Original) The system of claim 21 wherein the fastener comprises an adhesive material.

24. (Original) The system of claim 23 wherein the adhesive material comprises adhesive tape.
